When You Think of Overhead Door....

Think of Garage Headquarters

Your Garage Door Authority

Industry Trends: Wall-Mounted Garage Door System

Whether it's high ceilings, oversized garage doors, or just looking for extra storage space above, the wall-mounted garage door system from Garage Headquarters can fit your specific garage door specifications. It's easy to install and features a powerful 24V DC motor. Log on to garageheadquarters.com for more info.

Helpful Hint: Lubricate & Replace

A garage door is probably the largest moving object in the home and is typically used every day. Here's a few tips:

Lubricate racks, hinges, rollers & springs with a silicone base lubricant. Do not use any petroleum-based lubricate, it has the tendency to actually degrease.

Replace old springs. Garage door springs are arguably the most important and most dangerous part of the garage door. Springs wear out. When they break, injury can result. If the garage door is aging, have springs

Garage Headquarters

provides the highest quality and fastest service available to commercial customers.

We deliver this commitment daily throughout MA & RI

We also commit to providing you with monthly money saving opportunities and helpful industry information.

inspected and replaced if needed. If the door has two springs, have both replaced even if one is not broken. This will not only prevent any damage caused by the breaking of the second spring, but also keeps the door working efficiently.

Fingerprint Keyless Entry -Effortless Home Entry

Fingerprint keyless entry makes home access even more effortless - no lost keys, nothing to carry and now no codes to remember. It uses fingerprint technology to make garage door access quick, safe and secure. Check out our website to find out more.
