PERFECTLY MODERN.

For the stylish and environmentally conscious homeowner, the elegant aluminum Cambridge Collection may be the modern touch your home is craving.

Expertly engineered of aluminum and glass that will give your home the perfect blend of industrial and ultra modern. As the only series that is fully recyclable, full view aluminum glass garage doors are a great way to reduce your footprint and keep the environment in mind. With crisp lines and sleek design, the Cambridge Collection is a unique solution for your extraordinary home.

YOUR #1 GARAGE DOOR AUTHORITY

DESIGN DEFINITION

The aluminum rails and stiles are designed with crisp 90-degree, non-beveled edges and visually perfect straight lines to give your home an architecturally authentic contemporary look with superior curb appeal.

Our stylish, galvanized hinges and fixtures help create a clean, cohesive look without compromising functionality or quality.

A Dramatic Statement and A Custom Fit

Curb appeal sells. Updating your garage door is a guaranteed way to increase buyer interest and the ROI of your home. Even if you are not looking to sell your home, you still want it to turn the heads of your neighbors. A full view aluminum garage door is guaranteed to be a showstopper!

Combining the design elements of an industrial look with the clean, modern glass panels makes for a unique look that is undeniably gorgeous. Your garage door can take up a large portion of the view of the front of your home. You might as well choose one that looks amazing.

The Cambridge Collection of modern aluminum doors presents contemporary elegance with sleek lines while delivering maximum light infiltration into the garage space. Unparalleled visual appeal, strength and light infiltration.

SUPERIOR WEATHER SEALS

Our GHQ signature weather-sealing system includes a heavy rubber bottom seal with integrated ice and water shields to keep out the elements. Engineered foam seals along the vertical edges offer superior performance and longevity, versus the generic rubber lip seal. Wind load reinforcement can also be added to practically all doors to meet local building codes for additional peace of mind.

DOOR CONSTRUCTION

The Cambridge Collection is made of 2-1/8" durable commercial-grade aluminum, making it virtually maintenance-free, corrosion resistant, and long-lasting. Strong integrated stiffening struts are included within the design for enhanced durability. Reinforcement struts do not protrude into the vision panels, providing a clean look and a wide area of unobstructed view as integral section joint seal for further reduction of air and water infiltration.

NATURAL LIGHT IS THE BEST LIGHT

As garages host multiple uses outside of vehicle storage, the best light to work by is natural light. A full view aluminum garage door lets in the natural light that is perfect for working under. The door can remain closed while you go about whatever it is you do in your garage. The customizable glass panel options allow you to decide how much light you want.

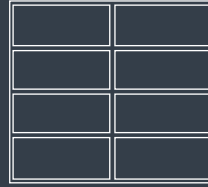

INSULATION PACKAGE

Aluminum does conduct energy including warm and cold air more than steel or wooden doors. Cambridge Collections doors are fully sealed to ensure tight construction. To further control the excess cold and heat coming in through the garage, optional insulated section rails are available, providing additional thermal protection for your garage!

Modernize Your Home with Our Crowd-Favorite

The durable aluminum frame is available in a number of colors, including clear, black and bronze anodized, to complement your home style. Multiple glass options allow you to bring as much or as little natural light in as well as control the level of privacy.

Anodized aluminum and powder coat finishes keep your door looking great without rusting or corroding over time. The only maintenance required is a wipe down to remove any dirt accumulated from normal life outdoors.
