

# PLANNED MAINTENANCE PROGRAM

**Protect Your Investment.**

The most cost-effective way to avoid downtime and maintain safety is a Garage Headquarters – Overhead Door™ Planned Maintenance Program.

YOUR #1 GARAGE DOOR AUTHORITY

# FEATURES & SERVICES

**CUSTOMIZE** your Commercial, Industrial, and Loading Dock service with our **FACTORY AUTHORIZED & CERTIFIED SERVICE PROGRAM**. Explore the complete range of services of true trained experts.

## INSPECTION

Each and every part, fastener, weld, and the overall equipment operation is thoroughly inspected and evaluated for function.

## LUBRICATION

All moving parts and assemblies receive applications of all necessary lubricants according to manufacturer requirements.

## EQUIPMENT CLEANING

We conduct a thorough cleaning of all moving parts to remove debris build-up as a result of typical equipment operation. Cleaning the surrounding area promotes safety and removes outside interference.

## IMMEDIATE RESPONSE

The GHQ Planned Maintenance Program prioritizes immediate action in emergency situations, which expedites the return to normal business swiftly.

## CUSTOM ENGINEERED PARTS AND FABRICATION

While a Planned Maintenance Program may extend the quality and duration of your equipment, it cannot guarantee unending life to any product.

Eventually parts reach the end of their functional life and require replacement.

Upon the customer's authorization, the necessary parts will be replaced. Parts and labor will be billed additionally.

## ACCOUNTABILITY

One of the Planned Maintenance Program objectives is to meet your company's insurance requirements as it pertains to on site subcontractors.

When our trained service personnel work on your equipment, the result is a detailed service record for your files.

# FEATURES & SERVICES

CUSTOMIZE your Commercial, Industrial, and Loading Dock service with our **FACTORY AUTHORIZED & CERTIFIED SERVICE PROGRAM**. Explore the complete range of services of true trained experts.

## MAXIMIZING INVESTMENT

With over 50 years of experience as Rhode Island and Southeastern Massachusetts' leading overhead door and loading dock dealer, GHQ offers a Planned Maintenance Program so beneficial and cost effective that it will increase your workers' productivity, safety and extend the lifespan of your equipment.

## INCREASE PRODUCTIVITY, DECREASE DOWNTIME

A Planned Maintenance Program ensures proper equipment operation, avoids costly breakdowns and increases on-the-job productivity. Our factory-trained personnel use authorized OEM parts and specifications to preserve your equipment warranty's integrity.

## SAFER WORK ENVIRONMENT

When you regulate your equipment, you achieve the safety standard required for quality operation. Prevent OSHA citations and reduce worker's comp. claims by troubleshooting possible hazards.

## COST AND EFFICIENCY

In order to assure a cost effective visit, we will pre-schedule with your representative. Prior to the service appointment, we request free and easy access to the equipment to help keep repair costs down and allow the visit to be completely dedicated to inspecting and repairing equipment.

## ADJUSTMENT

Over time, parts become disengaged and misaligned. Therefore, adjustments are needed on a periodic basis. Our service professionals regularly adjust equipment as stated in the manufacturer's manuals to maintain proper working conditions.

## FINAL INSPECTION

After a final inspection of the entire operation of equipment, our service representative makes recommendations and notes future required parts.
